Run advertised programs

These instructions are used when you need to install an approved program on your computer.

To Run or Check Advertised Programs
- From the Start menu, choose Control Panel (or Settings/Control Panel)
- Double click the Run Advertised Programs icon to open. Note, a list of programs available for installation will appear.

- Click to select the program you wish to have installed, Note there are generally 2 programs, Install and Uninstall. When you want to install a program, use only the Install link (the top one).

- Click Run
- The program will then run, usually in the background, and your program will be installed.

Note: DO NOT run the Uninstall program unless you are asked to by I.T.. This program, as the name suggests will remove the program.
