

Guidelines for approvals from other Accredited Institutions

Where a project is conducted on other accredited premises, review, approval and monitoring shall be by the accredited institution's Institutional Biosafety Committee (IBC) and or relevant Safety Committee. A copy of the original proposal, approval letter and all associated correspondence received from the accredited organisation's IBC shall be provided to the UWS Biosafety and Radiation Safety Committee (BRSC) for comment and formal noting. UWS will be held liable for any acts of its employees that contravene the Gene Technology Act (2000), [Gene Technology Regulations](#), Radiation Control Act (1990), [Radiation Control Regulations](#) and safe work practices.

For collaborative projects, any part of the project conducted on UWS premises must be reviewed and approved by the UWS BRSC. UWS BRSC will monitor all such projects on its premises.
